RIDGE DEAN HERD

Foreword

The names Michele Wilde and "Ridge Dean" are synonymous with the very best of British Blue cattle. Pedigree breeders worldwide will know this.

As auctioneers entrusted with the privilege of conducting this, Michele's fifth "Wilde about Blues" sale, we hardly need remind progressive breeders of quality beef cattle exactly why Ridge Dean has achieved the success it deserves but we shall, anyway!

Several key words come to mind as soon as we mentioned "Ridge Dean" herd Longevity, Natural Calving Strong Cow Families to name a few. These coupled with size, conformation and mobility are why this herd has earned for Michele Wilde, Premier Breeder of the Year on no less than 11 times, and also why purchasers at her previous sales have been impressed enough to return time and again to invest in Ridge Dean stock.

Since the last sale in 2006 numbers in the herd have steadily increased and with winter housing stretched to the limit and diversification into fresh areas, Michelle Wilde and her team have no option but to put on the open market this wonderful unselected batch of 21 heifers, 8 FOT calves with recipient dams, 1 bull and 31 frozen embryos. Even though, after 28 years her enthusiasm for the breed and that addictive quest to breed the perfect animal is as strong as ever.

Over time two particular cow families have developed so successfully that they dominate the herd through their daughters, granddaughters and great granddaughters. They trace back to two famous Ridge Dean cows, Jessie and Kosher. Through selective breeding and embryo transfer prospective purchasers will be able to choose from a wide selection of animals closely related to those great brood cows –

- **Ridge Dean Valentine**, a daughter of Jessie, has produced outstanding progeny, three of her heifer calves averaging over 6200gns and her sons selling up to 7600gns.
- **Ridge Dean Navette**, another Jessie daughter is a legend in her own right, producing stock noted for their size, power, working ability and natural calving. They are much sought after having proven to be show winners and sale toppers. Navette's last two bull calves were sold in Carlisle in February this year – one took the Supreme Championship and they averaged 9000gns.

Jessie's line is noted also for its natural calving and fertility (Jessie herself having successfully produced 129 registered pedigree offspring). So much so that even breeders from USA and Australia have called to report top prices reached for her progeny due to their style and power.

All the cows at Ridge Dean are managed naturally and with the long hard winter and late spring the stock are possibly not quite as forward as usual. Their potential however is probably greater than usual, and we can strongly recommend this, The Wilde About Blues sale – Part 5, to all established and new breeders and commercial producers alike.

Herd status:

- Johnes controlled since 1999
- BTV vaccinated (vet vaccinated all calves and recps and maiden hfrs).
- BVD and Lepto - all breeding heifers over the age of 14 months.
- All herd recipients are TB tested and tested for Lepto, BVD and Neo Spora and kept in isolation until clear to enter the herd.
